FOR IMMEDIATE RELEASE**

The rapid deployment of mobility solutions is as easy as 1-2-3 with Sky Technologies

Sky Technologies, providers of mobility solutions for use with SAP® applications have introduced 1▶2▶3 SkyMobile to the market - an innovative software installation process that enables mobility solutions to be installed in three easy steps

LAS VEGAS - Tuesday 9 September, 2008 – Sky Technologies, developers of mobility solutions for use with SAP® applications, will showcase their recently launched 1▶2▶3 SkyMobile at SAP TechEd 2008 Las Vegas, SAP's largest ecosystem education event of the year, being held in Las Vegas, Sept. 8-12.

Incorporated into release 16 of its SkyMobile solution suite - which is designed to further simplify the development and deployment of mobility solutions – the 1▶2▶3 SkyMobile solution not only makes the rapid deployment of mobility solutions a reality, it is also the *only* solution of its kind on the market today.

“When developing 1▶2▶3 SkyMobile, we built on the feedback we had received from our clients and partners over recent months,” commented Stephen Ware, CTO, Sky Technologies. “This release extends our proven technology and enables us to offer clients a reliable, valuable solution that stands alone in the current market.

“Moreover, this new functionality enables the base level components to be fully implemented in a matter of hours - not months. This means that highly valuable and tailored solutions can be delivered rapidly, without precious time being wasted on implementing the fundamental building blocks,” added Ware.

Troy O'Connor, CEO, Sky Technologies provided insight to the 1▶2▶3 SkyMobile offering that is available at TechEd 2008 Las Vegas, where Sky Technologies is exhibiting in booth #82.

“We encourage any SAP customer with an interest in mobility to come and see us at TechEd to receive their trial version of 1▶2▶3 SkyMobile so that they can see how easy it is to deploy mobility solutions for use with the SAP ERP, SAP Customer Relationship Management (SAP CRM) or SAP Supplier Relationship Management (SAP SRM) applications - in both online and offline operation modes,” said O'Connor.

“1▶2▶3 SkyMobile really needs to be seen to be believed. In short, we have the solution of tomorrow available for the market, *today*,” O'Connor added.

Building on the proven 'Innerware' concept, which enables middleware free mobility solutions to be delivered in days and not months, Sky's customer base is reaping the rewards of having online and offline mobility solutions on their smartphones, including the latest BlackBerry devices from Research in Motion. 1▶2▶3 SkyMobile will soon be operational on the iPhone and Nokia N Series Smartphone.

Moreover, a number of Sky's clients have commenced projects that will incorporate the 1►2►3 SkyMobile installation process, including:

- Mobile Field Service, enabling SAP CRM on a smartphone
- Two mobile plant maintenance projects, which both leverage the SAP ERP 6.0 backoffice and ruggedized handheld devices
- Sales activities on a BlackBerry smartphone, deployed from an SAP CRM-based environment
- Proof of Delivery and material 'track and trace', incorporating signature capture
- Purchase Order Approval on BlackBerry
- Shopping Cart Approval on BlackBerry with an SAP SRM-based backoffice

"We continue to enable our customers and partners to simplify the mobility experience and reap the rewards that having a truly mobile workforce can bring," Mr O'Connor concluded.

See 1►2►3 SkyMobile in action!

Bruce Johnson of Morse, exclusive distributors of Sky Technologies software in the Americas, will demonstrate how easy it is to use SkyMobile to build customised applications and be operational within hours. In his presentation, entitled 'SAP on BlackBerry - NOW!', Bruce will show how Morse, using SkyMobile, can take SAP solutions to the point of activity and mobilize them on a BlackBerry smartphone.

Watch as an application scenario is developed and deployed to a BlackBerry device in a matter of minutes, without the need for any additional hardware.
